# Never Too Busy To Cure Clutter: Simplify Your Life One Minute At A Time

This is a practical, actionable, and approachable book that is designed for people who have "lives". So many other books in the space are written by 20 somethings with no kids and nothing but free time on their hands (I'm looking at you Ms. Kondo). But, for those of us with jobs and kids and schedules packed end-to-end, spending 15 minutes folding a t-shirt to sit on end is just not going to happen. This book is different. The author understands a normal life because she herself has one that she juggles too. This book is written from that perspective and understanding. It's the sort of thing that you can pick up, turn to just about any page, and find at least one easy organizing task to make your space a bit better using the time and energy you have at the moment. No matter if that is two hours or thirty seconds, there are dozens of tips and ideas to fit either. The idea that making just a little bit of progress is far more valuable and rewarding than making none at all. Also, it is a start " thirty seconds here and 15 minutes there can clean up and organize a whole room. Seriously, get this book, If you even manage to do five small tasks it suggests it will be money well spent.

I have another book by Erin Doland that I have enjoyed very much, thus I also ordered this one. While I just got it and only flipped through it, knowing how this author writes and seeing her new book, I will be very excited to delve into it. It is a beautiful book with a lot of helpful insight and suggestions in it. I am also familiar with this author through a blog called 'Unclutterer' that is also very helpful in clearing out the clutter!

Erin Doland has done it again. This book is a vast collection of quick and easy things you can do to get a handle on your clutter and clear it out for good. The book is packed with tips for all areas of your home and has some larger projects you can tackle, too. It touches on building routines to help maintain your newly neatened home.

WOW, I really enjoyed all the tips and tricks in this book. It was a lot of things that were so sensible that I just never thought enough about. I have used many of the tips and will continue to keep on all the great ideas.

As a professional organizer, I LOVE this book! It takes the overwhelm out of getting organized and breaks down each project into tiny chunks. So tiny, in fact, that it even features 30-second tasks that one can do to contribute to getting more organized. Who could procrastinate about that?! I also love Erin's conversational writing style and some of the outside-the-box tidbits. For example, I really got

some golden nuggets out of the cleaning ideas, the life hacks (like having guests over without much notice) and the suggestion for no-slip grip tape for renters who have slippery wood stairs (like we do!). If you're ready to not just get organized but also transform your home into your sanctuary and make your life A LOT easier, then I highly recommend you pick up this book.

Absolutely a fantastic book! I love how she breaks down projects into small manageable tasks. Our household has already seen a dramatic change in how cluttered and organized we are, and we haven't even tackled one of her "weekend projects yet".

Sometimes I feel there is so much mess and clutter that I don't know where to start. This book has ideas for 15 second tasks for quick wins -- short chores to get or stay on track. There are plenty of creative ideas for tackling more based on how much time you have at the moment, minutes, hours or a weekend. When life gets crazy, checking off a 15-second item on my "to do" list can feel just as satisfying as finishing a bigger project.
